Electronic dictionaries: Both monolingual and bilingual dictionaries are available in
electronic format. Electronic dictionaries can be really useful if they are probably
used. This especially true with regard to pronunciation, as they often have an audio
feature that lets you hear the word spoken. This lets you check your own
pronunciation.

	Many countries now think that cars that burn fossil fuels should be replaced by electric cars. Electric cars don't burn gasoline in the engine, so they don't make the air dirty and unclean. They use electricity stored on the car in batteries.							
	The electric car is usually plugged in at night. The car can be plugged into a special charging unit even at houses. Some electric cars can be plugged right into a regular electrical wall outlet. Other need a larger outlet, like the kind that a stove or a vacuum cleaner plugs into.							
	The engineers are trying to make better batteries that hold more energy and last longer. To overcome the problem of charging electric cars, hybrid cars are also available. Hybrid cars combine the benefits of gasoline engines and electric motors. They can be designed to meet different goals, such as better fuel economy or more power.							
	48. Why don't electric cars make the air dirty and unclean?							
	49. When is usually the electric car plugged in?							
	50. Why do people use hybrid cars?							
	51. Electric cars use both fossil fuel and electricity. a. True b. False

parts of the face change shapes as we get older, but ears do not change their shapes. They only change in size.

Reading people's character from their ears is a very old science. In the past people thought that a person's ears with color were dangerous. They also thought that the shape of the ears showed if a person was musical or not. Today, too many people believe that the size and shape of the ears help you know if a person is musical. Ears are all different, and each different thing has a meaning.

Next time you look at a person, see if his or her ears are large, medium-size, or small. Look at the lobes(نرمه گوش). Ears that are always red mean that a person may get angry easily. Ears that are always cold and nearly white color mean that a person has a nervous character.

	متن زیر را بخوانید و به سوالات به صورت خواسته شده پاسخ دهید.							
	Suppose that you have a very small vocabulary. Also suppose that you don't know how to get the meanings of new words. When you come across an unfamiliar word, that word may stop your understanding of the passage. Your eyes pause too long on the word as you try to get its meaning. You go back and read the word again, try to get its meaning from the context. As a result, you read much more slowly than you should, and you find that the difficult word is a wall to your comprehension. Suppose that you know many words and you are skilled in finding the meanings of new words. Your eyes move quickly and you read rapidly. You comprehend what you are reading. If you have a good vocabulary, you are more interested in reading.							
	48. What may happen when you come across an unfamiliar word?							
	49. How does having a good vocabulary influence your reading habit?							
	50. What is the closest synonym for the word "suppose"?							
	a. believe b. accept c. understand d. imagine							
	51. Unknown words in a passage may make comprehension easier. a. True b. False							
	52. The meaning of a new word may be guessed from the text.  a. True  b. False

There are many languages in the world, some of which may seem harder to learn for second or foreign learners. But which is the most difficult language to learn? Well, it's not easy to reply because there are many factors to discuss.

A native speaker of French, for example, will find English easier to learn than Chinese, because English is very similar to French, while Chinese is very different. As a result first Language can affect learning a second language. The greater the differences between the second language and the first, the harder <u>it</u> will be to learn. Many people answer that Chinese is the hardest language to learn, possibly influenced by the thought of learning the Chinese writing system. Besides, the pronunciation of Chinese does appear to be very difficult for many foreign learners. However, for Japanese speakers, who already use Chinese letters in their own language, learning writing will be less difficult than for speakers of languages using the Roman alphabet.

Teachers and the conditions in which the language is learned also play an important role, as well as each learner's motivation for learning. If people learn a language because they need to use it for a living, they often learn it faster than people who study a language that has no direct use in their day to day life.

## Read the questions and choose the best choice.

- - a) learning first language
  - b) second language
  - c) difference of languages
  - d) Chinese language
- **42.** Hardness of learning a language can depend on......
  - a) how different it is from one's mother tongue
  - b) whether it is French or English
  - c) whether you are learning Japanese or Chinese
- d) how long it takes to master pronunciation

#### True / False

- **43.** Being familiar with writing system of the second language makes it harder to learn.
  - a) True b) False
- 44. The reason behind learning a language can slow down or speed up learning.
  - a) True b) False

#### Answer the following questions.

- **45.** Which language is easier for French people to learn, English or Chinese? Why?
- **46.** Why does a Japanese speaker find the Chinese writing system less difficult?

The research for new sources of energy has led into various ways. To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil and coal. Electricity is generated from coal, oil and natural gas, but the process has been proven to be expensive.

Experimental works are in progress to produce energy from other resources. Scientists and experts spared no pains to search for new ways of producing new source of energy. For instance, electricity has been produced with giant wind turbines. Geothermal power or the heat from the earth is also being tested to produce energy. Many societies are burning rubbish and other biological waste products to generate electricity. Not only changing unwanted products to gas or oil is a cheap way to produce energy, but also it is an effective way to get rid of waste.

Some experts expect service companies to expand hydroelectric power generated from streams and rivers. As an example, 50 years ago hydroelectric power provided one-third of the electricity used in the United States but today it includes only 4%. The oceans are another possible source of energy. Scientists are studying ways to change the energy of oceans' tides and waves into electricity. Experiments are also underway to make use of temperature differences in ocean water to produce energy.

Clean energy resources are vastly respected, valued, and used all over the world to keep the environment clean. As a result, scientists try to introduce new types of energy resources called clean energy resources to nations of the world.

### Read the questions and choose the best choice.

- **47.** Which is the best title for this passage?
- a) The use of waste products for energy
- b) The search for new sources of energy
- c) Effective ways of producing hydropower
- d) New discoveries in geothermal power
- **48.** Which of the following is **not** offered in the passage as a source of energy?
- a) Electrical power
- b) Clean energy
- c) Nuclear energy
- d) Hydroelectric power

#### True / False

- **49.** Changing waste products to gas or oil is an expensive way to generate energy, but it is very effective.
  - a) True
- b) False
- **50.** Geothermal power is the heat from the Earth.
  - a) True b) False

### Answer the following questions.

- **51.** What is hydroelectric power produced from?
- **52.** What will happen if the nations of the world use clean sources of energy?

Respect is a way of acting well or thinking highly about something or someone. You respect those who are important to you. You show your respect by being polite and kind. When you are impolite or act badly toward people, they may feel sad or angry. But whom should you respect the most? You must care for those who always care for you. You know that your parents care for you for every little thing. You must love them, respect them, and care for them. Besides bringing you into the world, your parents spend their time, energy, and strength to make sure that you have what you need or want. Telling them that you thank them reflects the level of your respect for them. The easiest way to show your love and respect is to tell them that you appreciate who they are and what they do. You can also do something small but meaningful, for example, wash the dishes, clean the kitchen after dinner or clean the rooms. Your parents will pay attention to and appreciate your acts of kindness. You may also tell your mom how well she cooks, or tell your dad how great he is at his job. For most of parents, any of these small things can be a sign of respect. «ادامه ی سؤالات در صفحه ی چهارم»
